

Travaux Pratique : 1

Matière : Administration Base de données avancée

Enseignant : Anis Mourali

Niveau : GL4

Année : 2019

Sujet : Interprétez et analysez le rôle de chaque requête dans le cadre d'un audit d'une base de données ORACLE 11G.

Chaque binôme doit envoyer un rapport détaillé par email sur l'adresse : anis.mourali@bvm.com.tn

1.2.1 Remove the sample user 'BI'

```
SELECT username FROM ALL_USERS WHERE USERNAME='BI';
```

1.2.2 Remove the sample user 'HR'

```
SELECT username FROM ALL_USERS WHERE USERNAME='HR';
```

1.2.3 Remove the sample user 'IX'

```
SQL> SELECT username FROM ALL_USERS WHERE USERNAME='IX';
```

1.2.4 Remove the sample user 'OE'

```
SELECT username FROM ALL_USERS WHERE USERNAME='OE';
```

1.2.5 Remove the sample user 'PM'

```
SELECT username FROM ALL_USERS WHERE USERNAME='PM';
```

1.2.6 Remove the sample user 'SCOTT'

```
SELECT username FROM ALL_USERS WHERE USERNAME='SCOTT';
```

1.2.7 Remove the sample user 'SH'

```
SELECT username FROM ALL_USERS WHERE USERNAME='SH';
```

2

2.3 Setting for the 'audit_sys_operations' parameter

```
select value from v$parameter where upper(name)='AUDIT_SYS_OPERATIONS';
```

2.4 Setting for the 'audit_trail' parameter

```
SQL> select value
```

```
from v$parameter
```

```
where upper(name)='AUDIT_TRAIL';
```

2.5 Setting for the 'global_names' parameter

```
select value from v$parameter where upper(name)='GLOBAL_NAMES';
```

2.6 Setting for the 'local_listener' parameter

```
select value from v$parameter a where upper(name) = 'LOCAL_LISTENER';
```

2.7 Setting for the 'o7_dictionary_accessibility' parameter

```
select value from v$parameter where upper(name)='O7_DICTIONARY_ACCESSIBILITY';
```

2.8 Setting for the 'os_roles' parameter

```
select value from v$parameter where upper(name)='OS_ROLES';
```

2.9 Setting for the 'remote_listener' parameter

```
select value from v$parameter a where upper(name) = 'REMOTE_LISTENER';
```

2.10 Setting for the 'remote_login_passwordfile' parameter

```
select value from v$parameter where upper(name)='REMOTE_LOGIN_PASSWORDFILE';
```

2.11 Setting for the 'remote_os_authent' parameter

2.12 Setting for the 'remote_os_roles' parameter

```
select value from v$parameter a where upper(name) = 'REMOTE_OS_ROLES';
```

2.13 Setting for the 'utl_file_dir' parameter

```
select value from v$parameter where upper(name)='UTL_FILE_DIR';
```

2.14 Setting for the 'sec_case_sensitive_logon' parameter

```
select value from v$parameter where upper(name)='SEC_CASE_SENSITIVE_LOGON';
```

2.15 Setting for the 'sec_max_failed_login_attempts' parameter

```
select value from v$parameter where upper(name)='SEC_MAX_FAILED_LOGIN_ATTEMPTS';
```

2.16 Setting for the 'sec_protocol_error_further_action' parameter

```
select value from v$parameter where
```

```
upper(name)='SEC_PROTOCOL_ERROR_FURTHER_ACTION';
```

2.17 Setting for the 'sec_protocol_error_trace_action' parameter

```
select value from v$parameter where
```

```
upper(name)='SEC_PROTOCOL_ERROR_TRACE_ACTION';
```

2.18 Setting for the 'sec_return_server_release_banner' parameter

```
select value from v$parameter where upper(name)='SEC_RETURN_SERVER_RELEASE_BANNER';
```

2.19 Setting for the 'sql92_security' parameter

```
select value from v$parameter where upper(name)='SQL92_SECURITY';
```

2.20 Setting for undocumented '_trace_files_public' parameter

```
select value from v$parameter where lower(name)='_trace_files_public';
```
